

Global Methyl Bromide Consumption for Soil, Storage and Structural Uses, 1991-1998 (MT)

Countries	Baseline	1991	1995	1996	1997	1998
Article 5 (Developing)	14,476	7,991	13,655	13,802	14,466	15,976
Africa	4,267	3,011	4,399	3,832	3,737	5,098
Middle East, Asia & Pacific	4,278	2,103	3,237	4,262	4,803	4,808
Latin America and Caribbean	5,753	2,627	5,874	5,590	5,733	5,815
CEIT	178	250	145	118	193	255
Non-Article 5 (Developed)	55,380	55,380	48,270	44,733	46,973	38,703
Europe & CEIT	19,660	19,660	20,840	18,178	16,918	11,760
USA, Israel, Japan and other	35,720	35,720	27,430	26,555	30,055	26,943
Total non QPS MB		63,371	61,925	58,535	61,439	54,679

Source: UNEP/TEAP 2000.

Note: QPS and feedstock are excluded from this table. 1998 data for Non-Article 5 and non-QPS MB are Estimated, as consumption data for Israel are not included.

Totals may not sum due to independent rounding.

- Total methyl bromide consumption between 1991 and 1998 nearly doubled for Article 5 countries and decreased by 30 percent for Non-Article 5 countries.
- The largest increases in consumption for Article 5 countries were in the Middle East, Asia and Pacific and Latin American and Caribbean regions. Consumption in the CEIT Article 5 countries decreased slightly.
- For Non-Article 5 countries, the greatest trend of decreased consumption was seen in Europe and CEIT between 1995 and 1998.
